Dear Partner!

We are making this year's holiday offer even more memorable with special new products.

Our indoor advent calendars (**KLW24, KLW25**, page 5) and our snowing musical mailbox (**LFS400**, page 5) will bring a smile to everyone's face. They are the perfect choice to enrich your Christmas collection! Our unique artificial pine tree range has been expanded with snowy, LED-lit products (**KMF8LED series**, page 40), which are available in sizes 150, 180, 210 and 240 cm. Let's not forget about the dazzling LED artificial wreath, which will already announce the festive atmosphere at the front door (**KMK45LED**, page 41)!

In addition to the new range, our popular and high-quality sparkling icicle curtains have been renewed and will now be available in a DOT LED version (**KKF300D5M, KKF600D10M**, page 18). Our KKL range, which can be used both indoors and outdoors, will also be available in a DOT LED version (**KKL D series**, page 27). The 35 and 70 meter long light strings no longer tangle. In addition to being easy to install, they provide wonderful festive lighting in 12 lighting modes.

One of the popular decorative items from last year, the patterned LED strip is now available in several sizes and in addition to gold, silver (**RLS10 series, RLS15 series**, page 31). Of the 5, 10 and 15 meter versions, the 15 meter version works with a mains adapter.

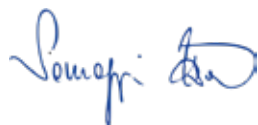

This year, you can order our premium series not only with black, but also with white wires (**KSIW, KSFW**, page 10). Our Micro LED products have been expanded with two 150-meter-long cold- and warm-white light strings (**ML 1500 series**, page 15) and can be rolled up on a plastic drum, making storage and installation easier.

We trust that our new products will help make your holiday offerings even more complete and magical!

We would like to wish you a peaceful and cozy Christmas and successful holiday preparations!

Our iSparkle smart light strings and light curtains product line can be used both indoors and outdoors, and **can also be controlled with a Tuya Smart-based application**, and in fact, several products can be grouped in the application. With the push of a button, you can dress in bright red the fir tree in the living room with a ball string light (LEDS120DV), the light curtain hanging on the kitchen window (LEDS120CV) and the icicles (LEDS108IV-1) on the terrace. Of course, you can control them separately if you like. Running, flashing, transitional, fading, fireworks and it would be difficult to list the 64 modes that the combination of colors and light effects results in. **Look for the video QR codes placed on our products and enjoy the unparalleled light parade!**
