CHRISTMAS AND DECORATION CATALOG

www.somogyinagyker.hu

Dear Partner!

This season's selection has been created to offer customers inspiring decoration solutions from the first days of autumn until the end of the Christmas holidays. The autumn season can bring warmth into homes with cozy lights and natural decorations.

Our new products include the **autumn maple leaf light string** (ATM01, ATM07), the **ivy leaf light string** (ATM05), the **acorn-shaped autumn light string** (ATM10), and the **cozy glass pumpkin decoration** (ATM13).

The most spectacular elements of the cozy, end-of-year preparations this year are the richly decorated garlands and large LED wreaths, which create a magical atmosphere right at the entrance. Select from our range, including the **KMG270LED** garland and the **KMK60LED** and **KMK45LED** large-sized light wreaths, so that your customers can easily find the decorations that best suit the style of their home.

One of the most spectacular novelties of this season, the **running light string lights** that can be used both indoors and outdoors, deserve special attention. Their dynamic play of light lends a spectacular appearance to facades, terraces and shop portals. The **LFF576** and the **LFI series** create a truly unique effect with their cold white lights running between warm white cluster LEDs. Among the versions available in various lengths, everyone can choose the size that perfectly matches the special decoration of their home.

Classic miniature railways, which are favorites of generations, continue to occupy a prominent place among Advent decorations. Our selection includes the steam-powered **TRN01** with sound and light effects, the musical **TRN04**, and the premium **TRN05** miniature railway set, which are guaranteed to be the defining decorations of the Christmas tree and the interior that suits the holidays.

Browse our catalog and look for more new products!

We trust that with the help of our this year's selection you can provide your customers with even more diverse and attractive elegant inspiration!

We would like to wish you a peaceful and cozy Christmas holiday and successful autumn-winter preparations!

Our iSparkle smart light strings and light curtains product line can be used both indoors and outdoors, and **can also be controlled with a Tuya Smart-based application**, and in fact, several products can be grouped in the application. With the push of a button, you can dress in bright red the fir tree in the living room with a ball string light (LEDS120DV), the light curtain hanging on the kitchen window (LEDS120CV) and the icicles (LEDS108IV-1) on the terrace. Of course, you can control them separately if you like. Running, flashing, transitional, fading, fireworks and it would be difficult to list the 64 modes that the combination of colors and light effects results in. **Look for the video QR codes placed on our products and enjoy the unparalleled light parade!**
